06/16/2026

GAZ Energy continues to strengthen its position in the European battery storage market. We currently record projects with a total capacity exceeding 1.5 GWh across six European countries – Germany, Finland, Czech Republic, Poland, Slovakia, and Romania.

We will also present this milestone at the ees Europe/Intersolar 2026 trade fair in Munich, where we will discuss safe, transparent, and bankable next-generation BESS projects. We will showcase how we build on European technology foundations, an emphasis on cybersecurity, and local service.
